

Downloading the eBento Starter Kit Application via AppCentral

Employee Presented with Company Catalog

Each SMB
can have
their own

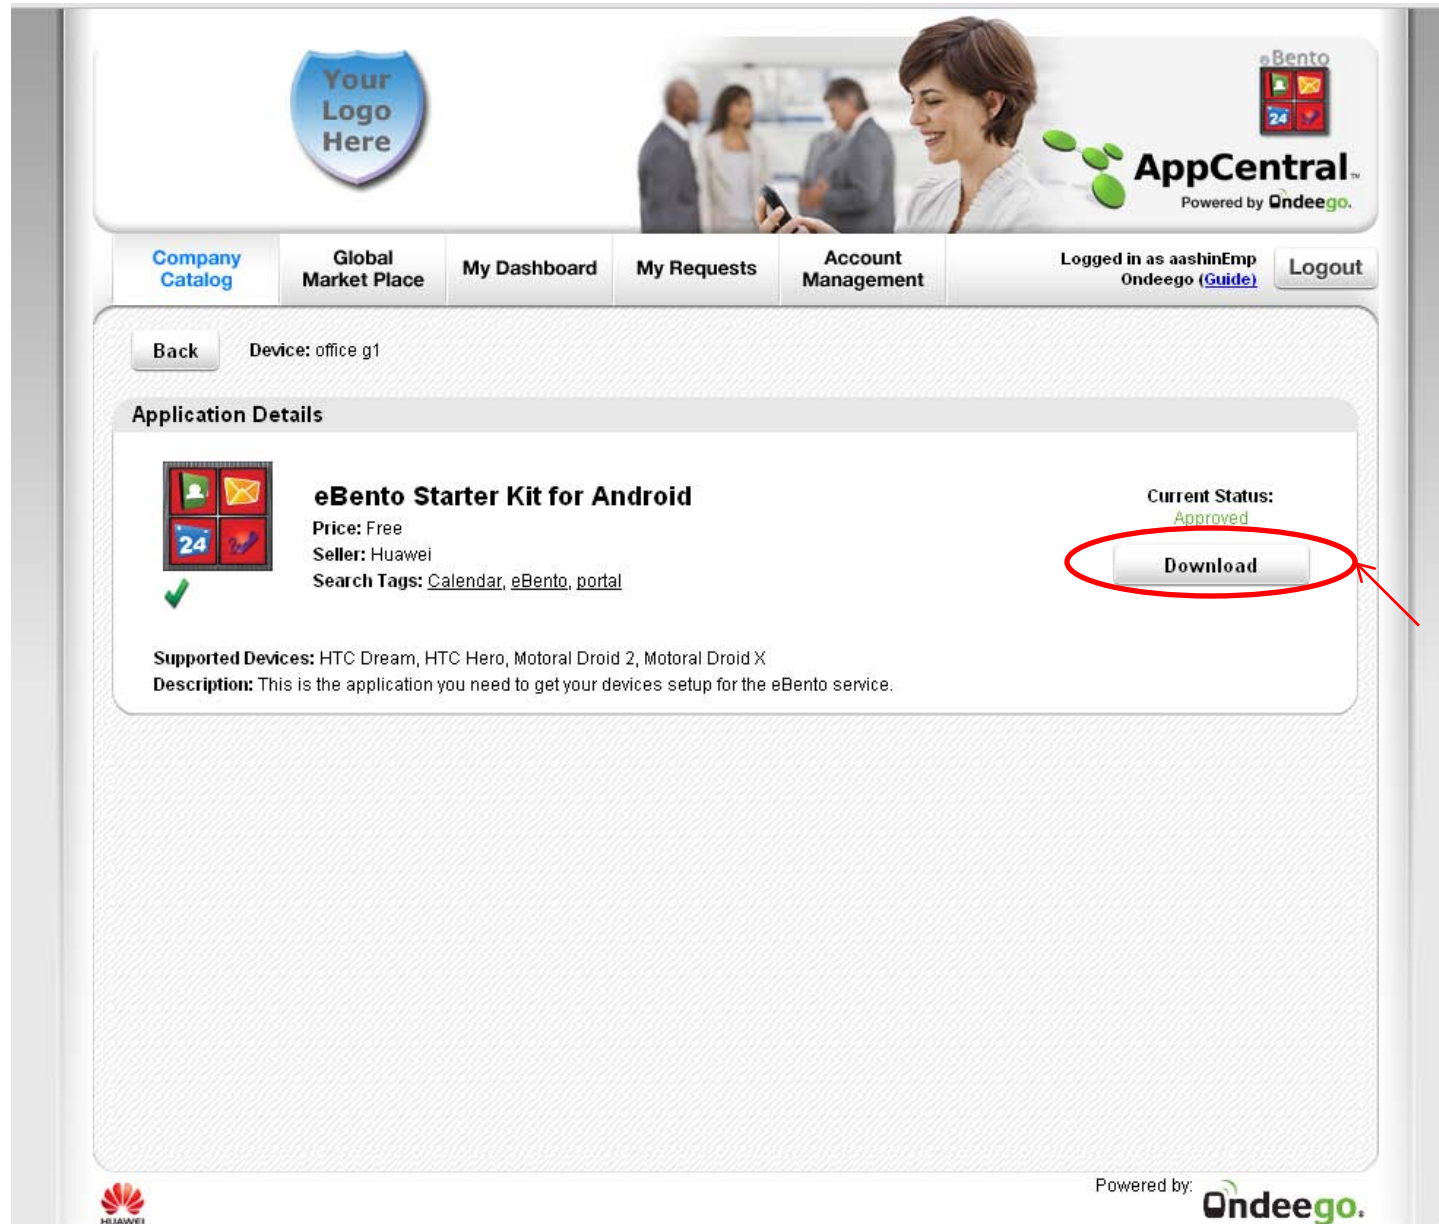

The screenshot shows the AppCentral interface. At the top, there's a header with a 'Your Logo Here' placeholder (circled in blue), a background image of people, and the AppCentral logo (Powered by Ondeego). Below the header is a navigation bar with links: Company Catalog, Global Market Place, My Dashboard, My Requests, Account Management, and a login status 'Logged in as aashinEmp Ondeego (Guide)' with a Logout button.

On the left is a 'Browse By' sidebar with two sections: 'Job Function' (listing Human Resources, Management, Procurement, Product Development, Project Management, Public Relations, Research, Reseller partner, Sales) and 'Category' (listing Calendaring, Communication, Contacts, CRM, Email, Expense Reporting, Mapping, Medical, Note taking, Personal Productivity, Phone Utilities, Project Management, Security, Travel, VPN).

The main content area is titled 'Users can have multiple' and features a 'Device:' dropdown menu set to 'office g1'. Below this is a section 'Apps A-Z' with a 'More...' link. It displays two app tiles: 'Conferencing Application for Android' (grayed out with a checkmark) and 'eBento Starter Kit for Android' (active with a green checkmark). A red circle highlights the eBento app tile, with an arrow pointing to it from the text 'Employee clicks on app'. A blue line points from the text 'Gray denotes user needs approval' to the grayed-out Conferencing app tile.

Below the 'Apps A-Z' section is a 'Recently Approved' section with a 'More...' link, showing the same two app tiles. At the bottom is a 'Most Popular' section with a 'More...' link, showing a partial view of app tiles.

Application Download Method Selection

The screenshot displays the AppCentral web interface. At the top, there is a navigation bar with links: [Company Catalog](#), [Global Market Place](#), [My Dashboard](#), [My Requests](#), [Account Management](#), and a user status indicator "Logged in as aashinEmp Ondeego ([Guide](#))" with a [Logout](#) button. The main content area shows the "Application Details" for "eBento". The application icon is a 2x2 grid of colored squares. Details include "Price: Free", "Seller: Huawei", and "Supported Devices: HTC Dream". A description states "Description: This is the applicati". On the right, the "Current Status" is "Approved" and there is a "Download" button. A modal dialog box is centered on the screen with the title "Download this application?". It features a large green downward arrow icon. Below the icon are three options: ☒ "Send an SMS to my device +18001234567", ☐ "Send the download to my email", and ☐ "Download to desktop". At the bottom of the dialog are "Submit" and "Cancel" buttons. The "Submit" button is circled in red. The background interface is dimmed. A small Huawei logo is visible in the bottom left corner, and the text "Powered by: Ondeego." is in the bottom right corner.

Download this application?

- ☒ Send an SMS to my device +18001234567
- ☐ Send the download to my email
- ☐ Download to desktop

Devices Supported in eBento V1 for Application Distribution

- Android 1.5+
- iOS 4.0+
- MeeGo

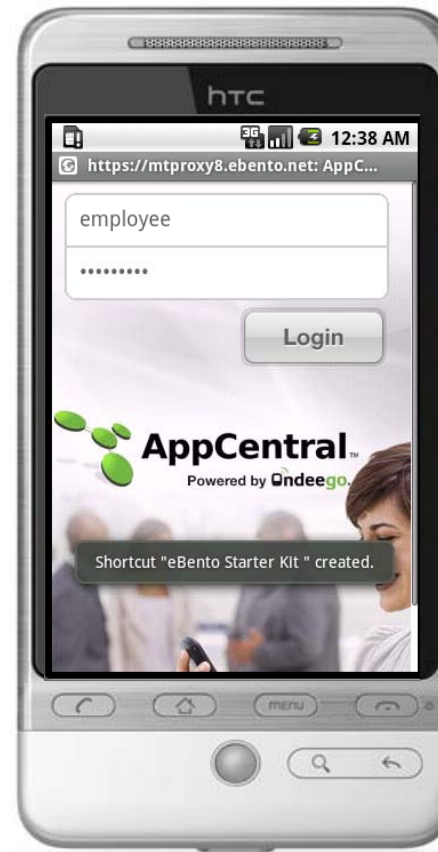

App Distribution on Android Devices (1.5+) via SMS

Employee receives requested URL via SMS

Clicking on URL brings up AppCentral login screen in web browser

Proper authentication, launches AppCentral Service on device and alerts user of shortcut creation.

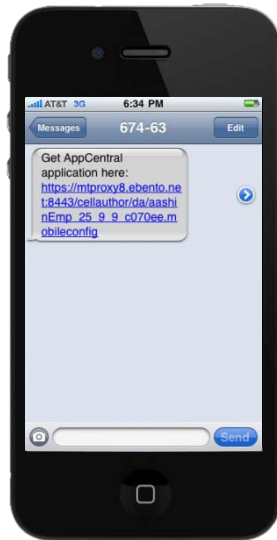

Shortcut to eBento Starter Kit can now be found on homescreen for easy access

OS Supported in eBento V1 for Application Distribution

- Android 1.5+
- iOS 4.0+
- MeeGo

App Distribution on iOS Devices (4.0+) via SMS (Method 1)

Employee receives requested URL via SMS

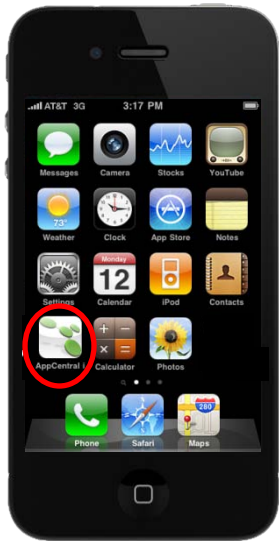

Clicking on URL brings up AppCentral login screen in web browser

After proper authentication, download process is initiated. Shortcut to eBento Starter Kit is now found on Employee's homescreen for easy access.

App Distribution on iOS Devices (4.0+) via On Device Client (Method 2)

IT distributes the AppCentral iPhone client via AppCentral IT interface and it sits on employee's home screen

Employee launches the AppCentral App and is asked to login

After login, employee is presented with custom app store for SMB.
Employee presses on the eBento Starter Kit Application

Employee hits "Download" and the installation process is instantiated

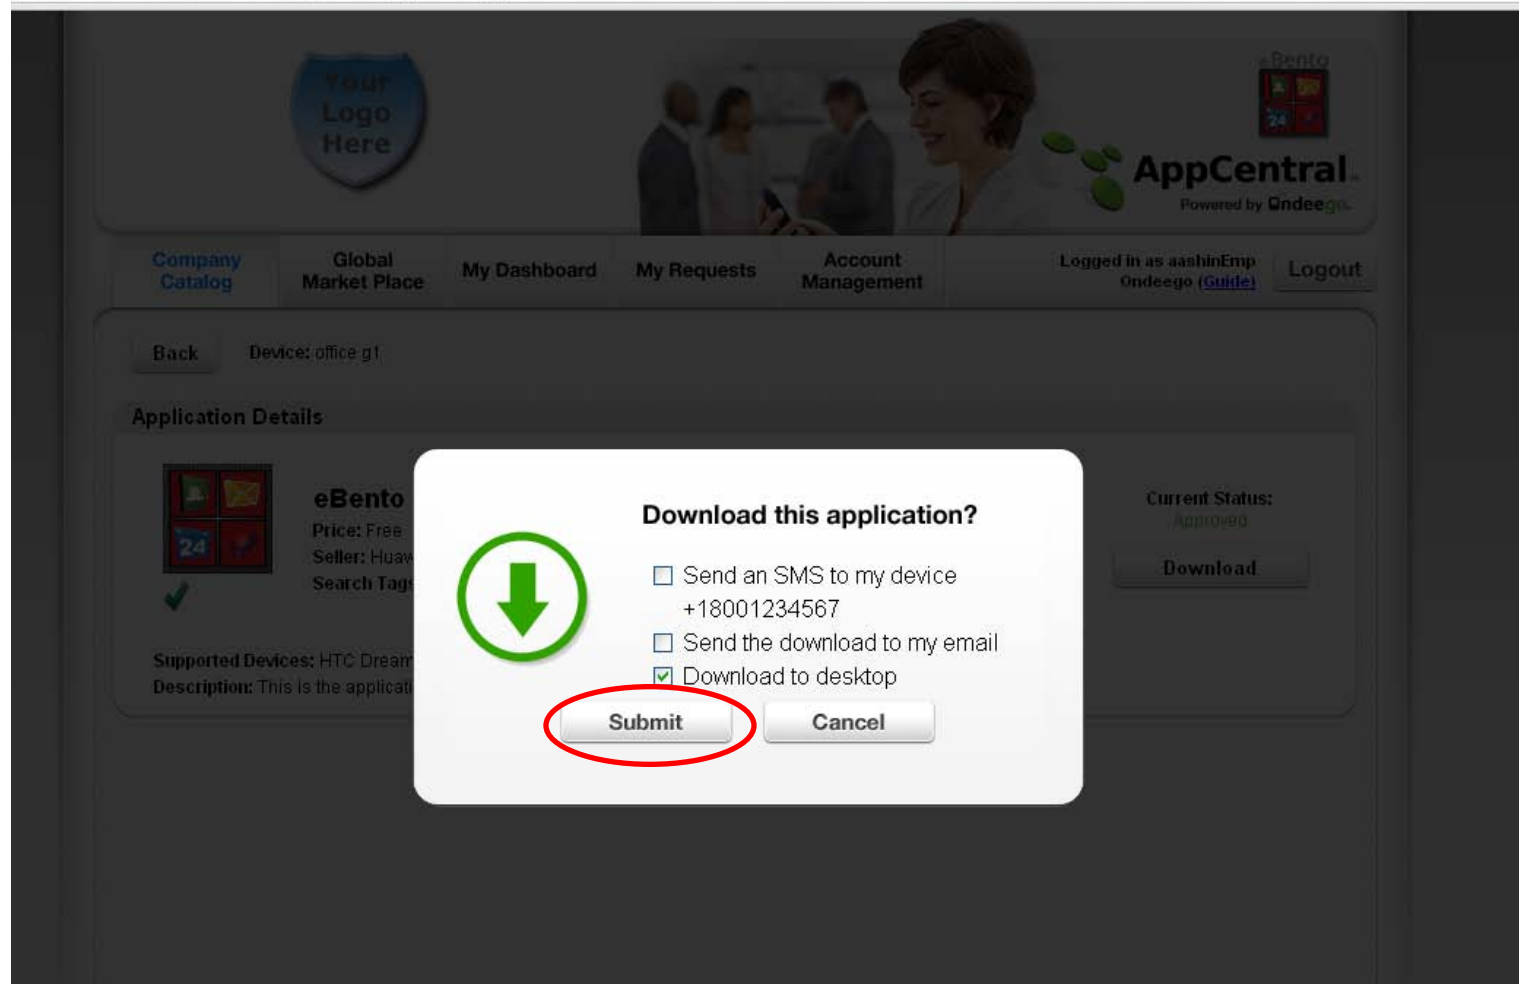

Shortcut to eBento Starter Kit is now found on Employee's homescreen for easy access.

OS Supported in eBento V1 for Application Distribution

- Android 1.5+
- iOS 4.0+
- MeeGo

Employee wants to directly create a shortcut

Distribution on MeeGo Devices V2 (Chrome Installable applications)

- This slide is not part of the presentation. I just wanted to let you know of another way.
- Information on this is available here:
http://www.readwriteweb.com/archives/weekend_project_install_google_web_apps_in_chrome_or_chromium.php
- I have not tried a development build of Chrome with .crx files. I will try this if time permits for this phase (this is out of scope).
- I might be able to do a quick exploratory test so that we can have screenshots of this flow.
